facebox_sdk is used for receive face recognition results from sharpAI system.
checkout master

```
Start
```

client.connect("x.x.x.x", 1883, 60)
modify x.x.x.x to your local ip, waiting for connection

facebox_sdk/python/main.py

on_message function will receive mqtt message
from sharpAI box, including face recognition data.

facebox_sdk/python/
mqtt_Client.py

Find status in the message

Stranger

Known person

stranger

According to person_id and group_id,
request person name by http://
workaihost.tiegushi.com/restapi/
get_name_by_faceid?
group_id=group_id&face_id=face_id

Will return all information about current face

```
End
```
